

SMART IRRIGATION FOR GREEN ROOFS

ecoDrip™ Smart Irrigation for Green Roofs

Deliver consistent moisture exactly where your green roof needs it with ecoDrip™, our engineered smart irrigation system designed specifically for vegetated roofs. Featuring commercial-grade components, precision drip technology, and intelligent controls, ecoDrip™ promotes healthier plant growth while conserving water and reducing long-term maintenance. Protect your green roof investment with a reliable irrigation solution built for performance, efficiency, and lasting results.

ecoDrip™ Options

- ecoDrip Core – Commercial dripline, filter, regulator, and controller.
- ecoDrip Smart – Core plus Wi-Fi controller, rain sensor, and flow monitoring.
- ecoDrip Pro – Smart package plus moisture sensors, remote monitoring, startup, winterization, and annual inspections.
